

4)Poderia ter usado nano também, mas usei cat para imprimir no terminal.

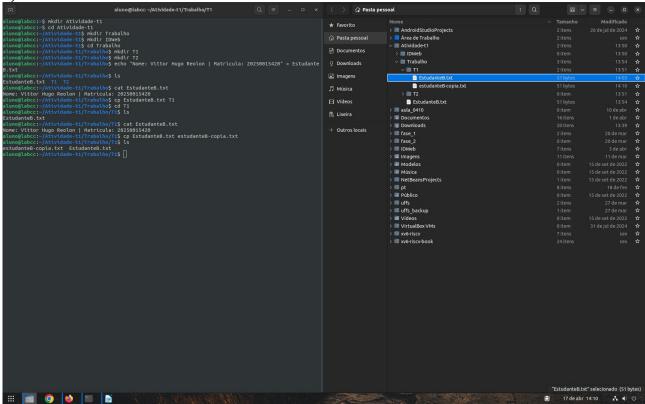

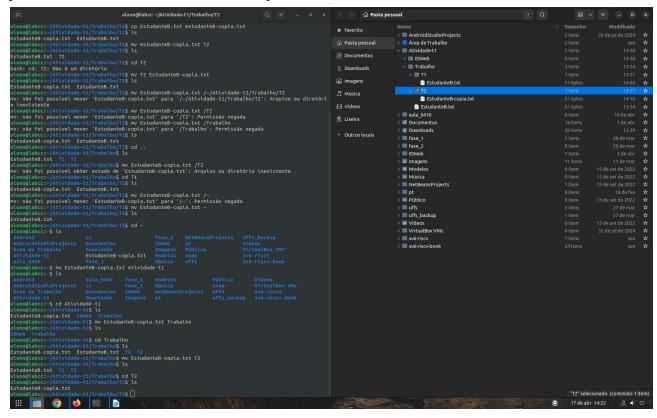

6)Usei cat novamente para imprimir e do outro lado abri o arquivo.

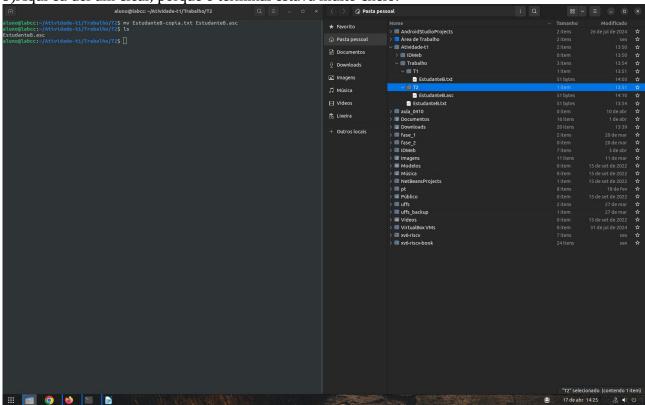

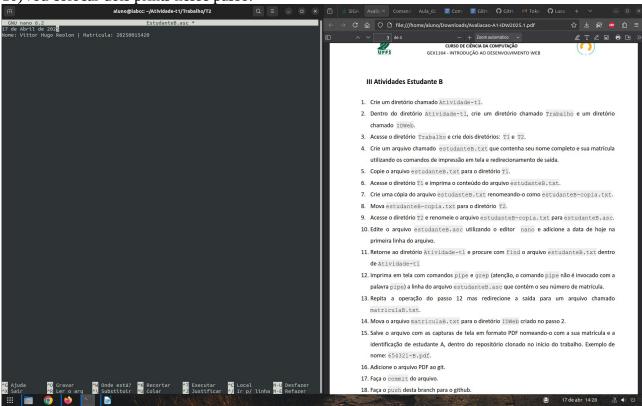

8) Aqui eu me perdi um pouco kkkkkk, aí fiz uma gambiarra de ir levando o aquivo desde o ~ até a pasta certa, mas no fim deu certo, acho que entendi onde tinha errado.

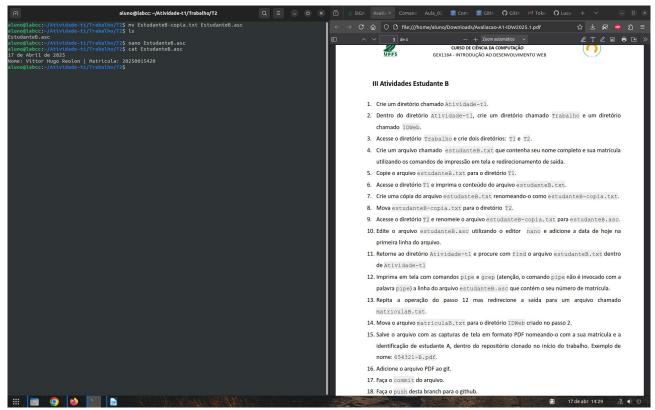

9)Aqui eu dei um clear, porque o terminal estava muito cheio.

10) Vou colocar dois prints nesse passo.

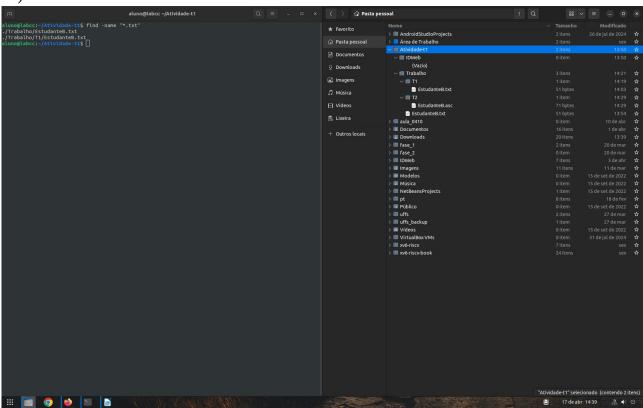

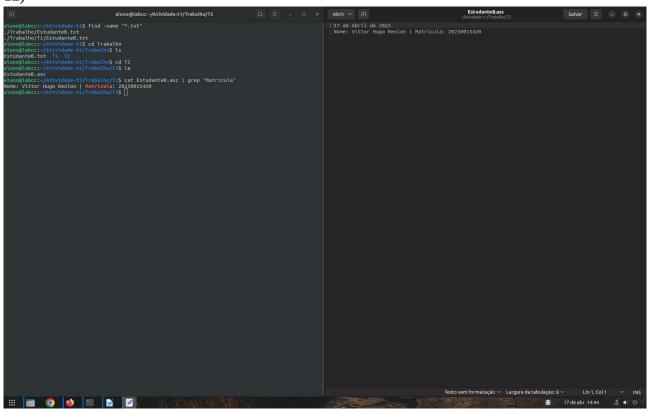

Primeiro print

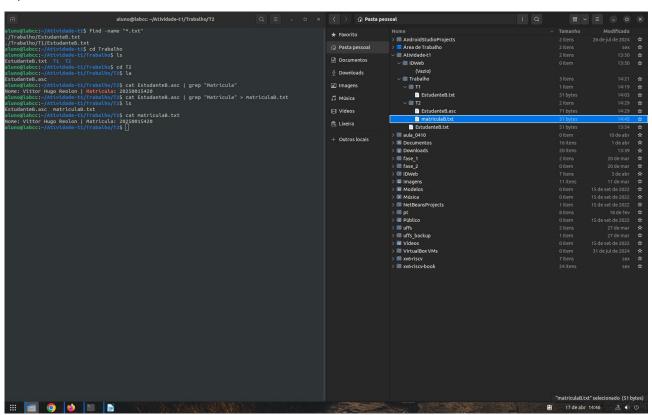

Segundo → só para mostrar pelo cat que alterei o arquivo.

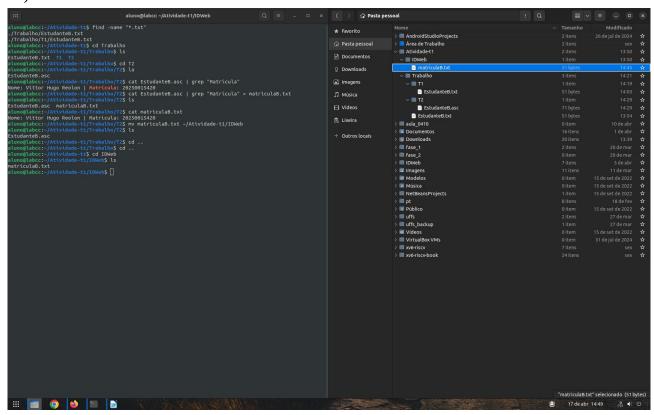

11)

13)

Fim.
